

## **FROZEN FINGER FUN FLY**

January 1

**At 8 A.M. or Thereabouts**

Club Field

It was anyone's guess what the weather was going to be like on New Year's morning. The temperature was a brisk 1 degree at 7:30am with a wind of zero and no clouds in the sky. As a few of us arrived we wondered if anyone would really show up. As it turned out, the group photo shows 27 with a few extras behind the scene. All had smiles and a great time! That is how it was last year, do you think your pilot enough to do it this year. Do what you must to change your schedule to make it. Even if it means finding your below army suit that is in storage.

Electric, Glow or Gas all are welcome at this event. No excuses are good enough to miss this. If it snows we will have a shuttle to get those who drive cars into the field.

Bring your plane, wheels, skis, field equipment, hot drink, and a great attitude. Start the New Year in the hobby we all love with good friends.
